

A Spring Garden

Spring is a ____ (adjective) time to be outside! There are so many sights to see and activities to do. An activity that the Spring season is great for is planting a garden! We can plant seeds that grow into ____ (flower), or we can plant some ____ (vegetable) to make into a delicious meal! The Spring is full of sunshine and it is warm outside!

First we need to gather all of our supplies to plant our garden. We will need ____ (something that holds water), a ____ (something to dig with), water, ____ (flower) and ____ (vegetable) seeds! We will also need soil to bury the seeds in, and the color of soil is ____ (color). Planting our garden should take us around ____ (number) minutes, and we will get to enjoy the sunshine and the breeze!

Let's roll up our sleeves, put our ____ (something that goes on your head) on, and get started! When we're outside, our next step is to use our ____ (something to dig with) and make a whole the size of a ____ (object) in the soil.

Put ____ (number) seeds in the whole, and cover the whole with soil again. Not pat, pat, pat the soil until it is nice and flat! Now we grab our ____ (something that holds water) and pour water over the soil while we count to ____ (number).

We might even see some ____ (insect) ____ (verb) around in the soil. Insects love to be outside, so keep your eyes ready to see them!

It is so fun to be outside in the Spring and enjoy the sun and nature. Let's finish planting our seeds, so we can have a big beautiful garden!
